

EMerge Alliance is the industry leader in creating vanguard standards and promoting the use of direct current in DC and hybrid AC/DC power systems.

WHO WE ARE

EMerge Alliance is a nonprofit, open-industry association established to promote the adoption of safe, pure DC and hybrid AC/DC microgrid systems that involve on-site power generation, integration, and distribution. Our members represent product manufacturers, architects, building owners and developers, engineering firms, environmental consultants, utilities, government agencies, and related academic and industry groups.

WHAT WE DO

EMerge Alliance develops vanguard system standards for hybrid AC/DC microgrids to accelerate deployment of flexible, sustainable, resilient electric power systems. We create open standards that integrate renewable and non-renewable power sources, wiring infrastructures, controls, and a wide variety of loads, from lighting to desktop and plug loads, and the vast array of electrical devices.

We are focused on the systems on both sides of the utility meter and support a common platform that adds flexibility, resiliency, safety, and sustainability to new and existing renovation projects. With a keen eye on renewable and site-based distributed energy sources, EMerge Alliance is helping prepare buildings, campuses, and communities for new energy platforms as part of an evolving new energy landscape.

OUR STANDARDS WORK

EMerge Alliance's focus is on filling gaps that new approaches leave in existing industry standards. The overarching objective is to complement (not compete with) and accelerate the work of traditional industry standards, codes and regulatory organizations.

Our work in new standards includes microgrids for Residential, Commercial, Industrial, Indoor Agriculture, EV Charging Infrastructure, Defense, Information & Communications Technology, Utility, Critical Health, and Municipal Services. It also incorporates standards for special devices for the incorporation of direct current technology.

OUR PARTNERS

EMerge Alliance collaborates with partners from industry, government, academia, and other related organizations.

JOIN EMERGE ALLIANCE TO:

- Influence development of vanguard industry standards shaping the new energy world. Gain early access to standards for faster registration and recognition of products and services.
- Build brand awareness and new business through trade show and conference engagement.
- Receive discounts on professional development events, and complimentary access to webinar series.
- Access robust network of industry leaders to create business opportunities and partnerships.
- Promote market development and economic/environmental benefits of clean distributed energy and resilient interconnected microgrids.
- Be recognized as an industry leader in DC and hybrid AC/DC microgrids.

Member Benefits	Governing Board**	Participating	General	Corresponding	Utility
EMerge Alliance Governance					
Seat on the board of directors, with voting rights on strategic plan, annual budget, and technical standards.	X				
Impact on committee selection and support	X				
Priority candidacy for committee chair positions	X				
Eligible for committee chair positions		X		X	
Influence Industry Vanguard Standards					
Full participation on EMerge Alliance committees	X	X		X	X
Review and input on standards committee proposals	X	X		X	X
Voting rights on standards at the committee level (must meet attendance requirements)		X		X	
Final approval vote on proposed standards	X				
Access to Issued Standards	X	X	X	X	X
Build Brand Awareness: Trade Show and Conference Engagement					
First choice on Tradeshow "live" demonstrations and speaking slots	X				
Priority preference in EMerge Alliance "live" demonstration and speaking slots		X		X	
Speaking opportunities as appropriate					X
Professional Development: Discounts on EMerge Alliance Events					
20% discount on EMerge Alliance events	X				
15% discount on EMerge Alliance events		X			
10% discount on EMerge Alliance events				X	X
Complimentary access to webinars series	X	X	X	X	X
Network with Industry Leaders to Create Business Opportunities					
Global recognition as an industry leader in hybrid AC/DC microgrids	X	X	X	X	X
Benefit from EMerge Alliance's network of industry liaisons and affiliated organizations.	X	X	X	X	X
<i>** must receive board approval to join at this level.</i>					

Annual Membership Fees	
Governing Board	\$25,000 Requires approval by EMerge board of directors
Participating Member	\$1,000 - \$10,000 – Based on annual revenues
General Member	\$750 - \$5,000– Based on annual revenues
Corresponding Member	\$500 - \$2,000– Based on annual revenues
Utility member	\$5,000 – Electric, telephone, and cable communication providers
